

Waterproofing

Technical Data Sheet

Applications:

Waterproofing is a high-quality impregnating agent developed using the most innovative technologies. It is used to waterproof all kinds of textile fabrics. Offers long-term protection from weathering and adhesion of dirt. Does not affect the fabric and leaves a spot and streak-free finish. Ideal for use on sails, vinyl, boat cushions, boat covers, sprayhoods and sail covers.

Instructions for use:

1. Always shake the bottle before use.
2. Make sure that the surface to be treated is clean and dry; for instance, by using Canvas Cleaner or, in the case of dead mould and/or weathering stains, Stain Remover.
3. Then allow the surface to dry completely.
4. Apply Waterproofing with a pressure sprayer or large-drop sprayer in such a manner that the surface becomes fully saturated.
5. Multiple treatments may be required for heavily porous surfaces.
6. Ensure that the surface is protected against the effects of moisture for at least 2 hours.
7. The surface must be completely dry before it is loaded.

Product usage:

Depending on the porosity of the substrate, the theoretical yield is in average 3-5 m² p/ ltr.

The above usage is indicative and should be determined by first applying to a small test area.

Considerations during application:

Always place a reference test on the to be treated surfaces in order to determine both adhesion and the technical and aesthetic result.

Specifications:

Appearance:	Liquid
Color:	Colorless to pale yellow
Scent:	Characteristic
Degradability:	Biologically optimal
Density:	1,1 g/cm ³

Hazard symbols and H & P statements (CLP):

Waterproofing is not categorised in accordance with Regulation (EC) no. 1272/2008 (CLP). However, it is advisable to wear PPE at all times. Please consult the MSDS sheet for this.

Packaging and industrial waste:

Treat as industrial waste in accordance with the applicable regulations. Collect process water in accordance with the applicable local regulations.

This information is based on laboratory tests and practical experience. **For application and use, please adhere strictly to the descriptions in the technical product information sheets and MSDS sheets.** We do not accept any liability for any advice provided by us. The application, use and handling of the products are the sole responsibility of the user. All our documents and texts have been prepared to the best of our knowledge, language and translation errors are expressly excluded and can never lead to any liability.

Waterproofing is part of the Impressed Pro® Marine product range, developed to clean and preserve all types of all common surfaces and materials on and around boats and/or ships. For specific questions and applications, as well as for the up-to-date TDS and MSDS sheets, please visit our website www.impressedpro.com or contact your distributor and / or technical advisor.
